RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This paper is filed in response to the Office Action mailed July 13, 2005 that made restriction and election of species requirements. Applicants were requested to elect one of ten designated groups.

In response to these requirements, Applicants hereby elect with traverse the invention of group II, directed to a method of treating paper making pulp, comprising alkaline treatment followed by pectate lyase treatment, classified in class 435, subclass 96. Applicants were also required to elect a species in claim 8, either i) hydrogen peroxide or hydrosulphite bleaching or ii) repulping of recycled pulp. Applicants elect species i) of claim 8 directed to hydrogen peroxide or hydrosulphite bleaching. As indicated in the Office Action, claim 8 is generic. Applicants hereby reserve the right to file continuing applications directed to the nonelected subject matter.

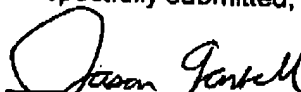

The basis for traverse is that there would not be a serious burden on the examiner if restriction were not required. Groups I, II, III, VI, VII, VIII, and IX are all classified in Class 435, subclass 96. Clearly, as they are classified in the same class and subclass, the examiner would be searching the same art and it would not be an undue burden on the examiner to search at least these groups together.

Moreover, Applicants submit that claim 1 links all of the inventions and the examiner is requiring the applicants to redraft the generic claim. Therefore, upon allowance of the linking claim, the restriction requirement as to the linked inventions should be withdrawn and all claims within the linked inventions should be examined in the instant application.

The Examiner is hereby invited to contact the undersigned by telephone if there are any questions concerning this response or application.

Respectfully submitted,

Date: August 15, 2005
